

Sustainable Banking Scorecard

Assessing a Bank's Commitment to a Green Agenda
22 September 2015 – Green Inclusive Finance Conference
Korzo Theater, Den Haag, The Netherlands

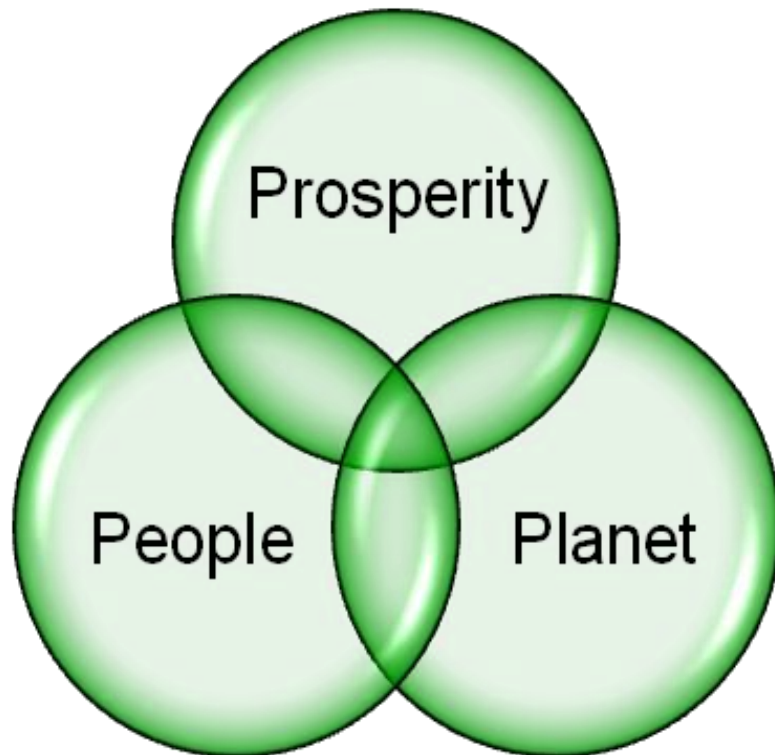

Sustainability Banking Scorecard: The Structure

Sustainability Banking Scorecard: The Structure

Triple Bottom Line Activities: Categories to Consider

People: social empowerment

Education, health care, social inclusion, arts and culture, or special needs housing

Planet: environmental regeneration

Renewable energy, energy efficiency or retrofits, green-oriented housing or buildings, waste or pollution reduction, water efficiency and access, or sustainable agriculture

Prosperity: economic resiliency

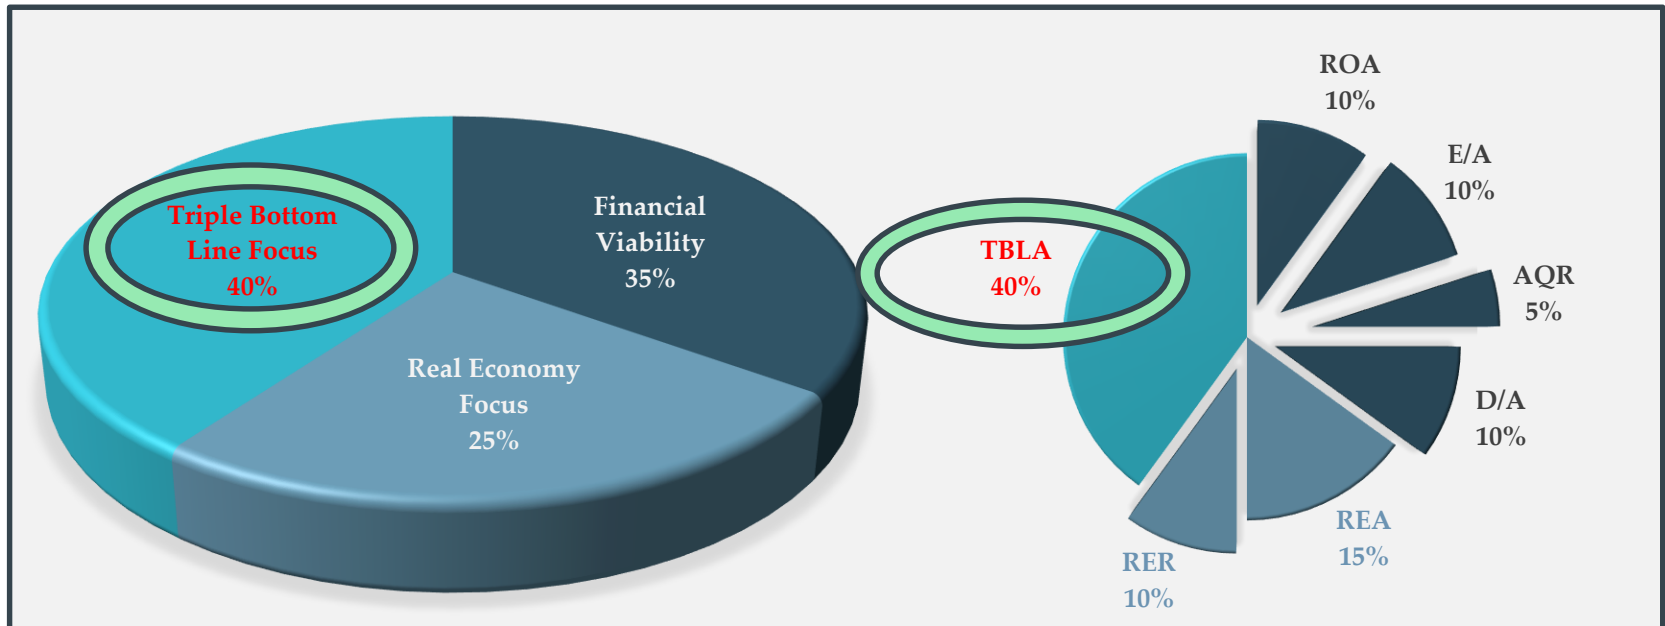

MSME lending, micro-finance for micro-enterprises, or economic inclusion

**Money at Risk may meet more than one
of these Triple Bottom Lines**

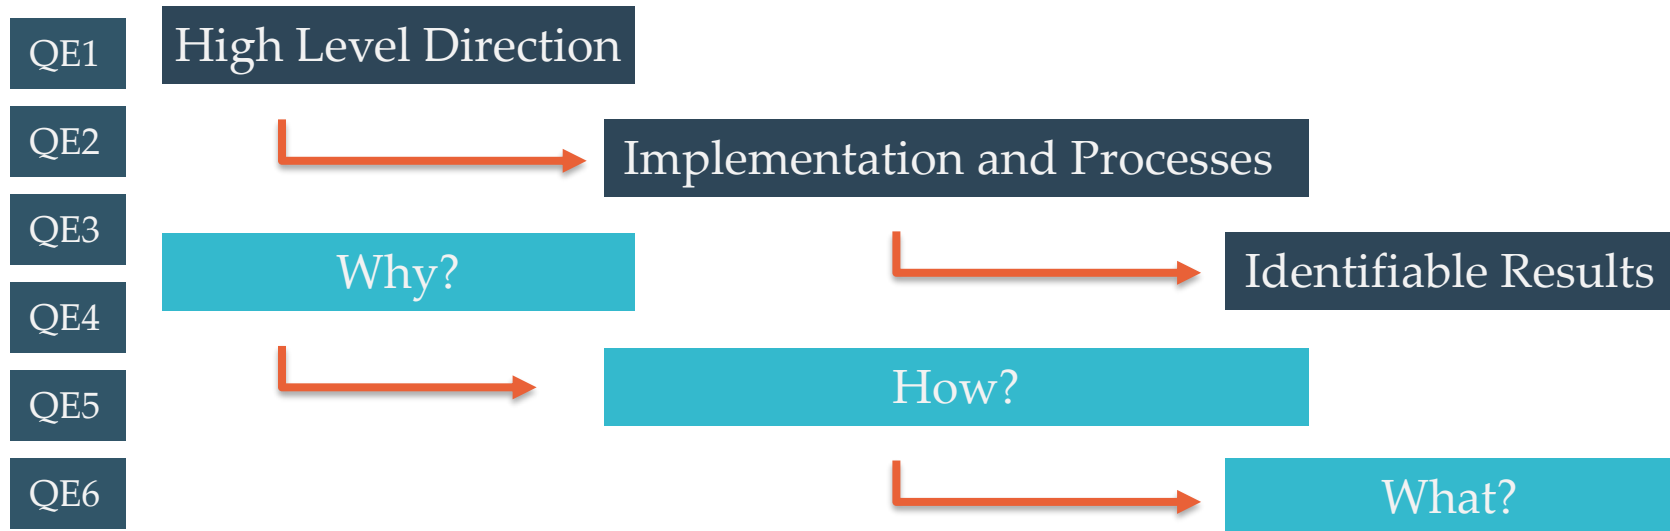

Quantitative Factors: Overview

A variety of Quantitative Factors are measured with a focus on using existing financial reporting information supplemented by management accounting elements. Management accounting reporting allows for more transparency and consistency.

The Quantitative Factors provide insight into three elements – Financial Viability, Real Economy Focus and Triple Bottom Line Focus – addressed in the Principles

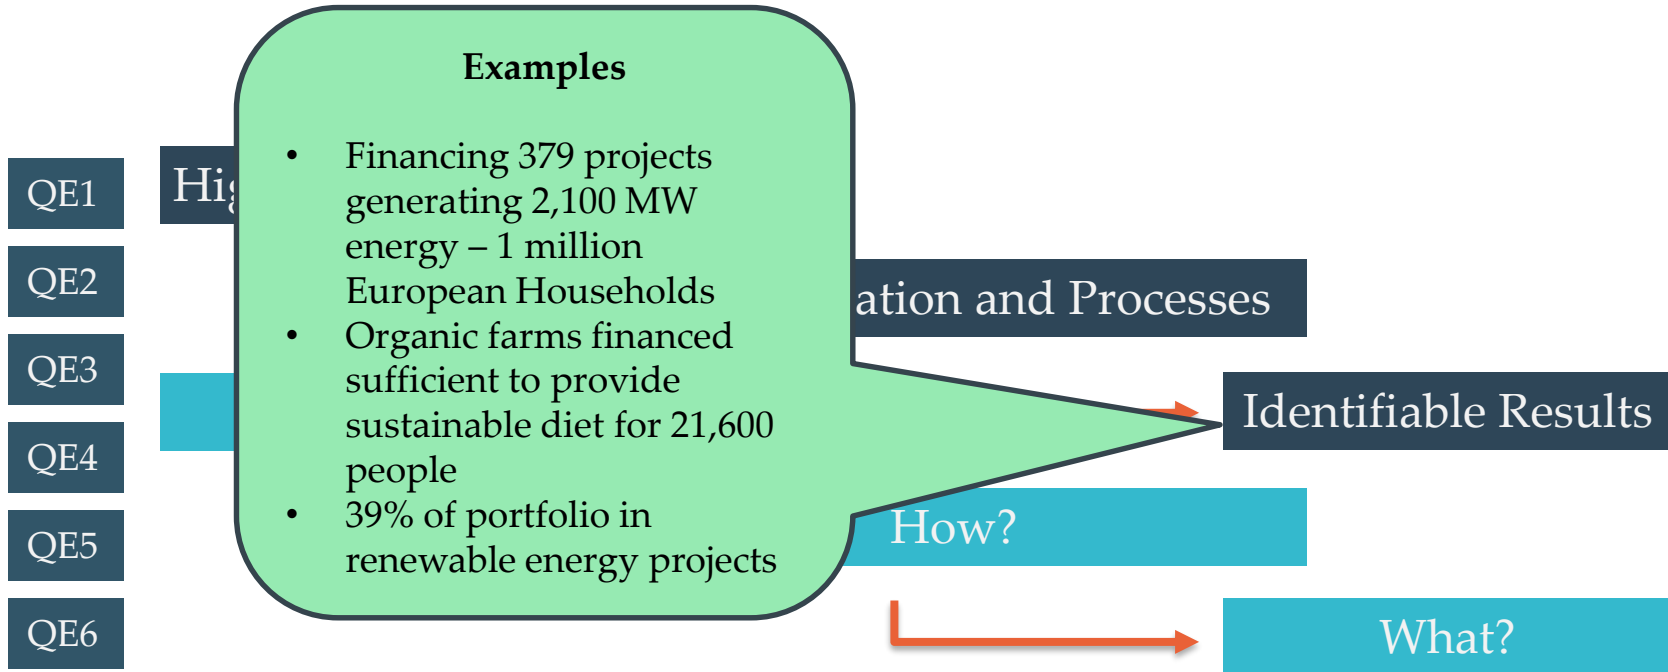

Qualitative Elements: Show the Flow

A holistic **Flow** from High Level Direction to **Identifiable Results** is required to provide grounding to support the banking institution's commitment to the Principles of Sustainable Banking

Qualitative Elements: Show the Flow

A holistic **Flow** from High Level Direction to **Identifiable Results** is required to provide grounding to support the banking institution's commitment to the Principles of Sustainable Banking
