

# Erratum to the A billion to Gain report

Unfortunately the data in figure 13 on page 17 has been miscalculated. The correct numbers are shown below.

From the correct data it can be concluded that Latin America still receives the lion's share of funding from NpM members (31% of total commitments in 2013). The share remained fairly stable in comparison to 2010 (32%). As a result, the previously drawn conclusion that NpM members increased their funding to Latin America from 24% in 2010 to 30% in 2013 (a large increase of 6%-points) no longer holds.
